

Contents

1 EXECUTIVE SUMMARY	1-1
1.1 Introduction	1-1
1.2 Background	1-1
1.3 Overall Objective	1-2
1.4 FSR basis	1-2
1.5 Guideline of FSR	1-3
1.6 Main Engineering Facilities	1-3
1.7 The Main Conclusions	1-8
1.8 The Problems and Recommendations	1-11
2 Market and Price	2-1
3 Processing Capacity, Product Slate and Configuration	3-1
3.1 Processing Capacity	3-1
3.2 Product Slate	3-1
3.3 Configuration	3-3
4 Process Units	4-1
5 Feedstock, Auxiliary Material and Fuel Supply	5-1
5.1 Feedstock Supply	5-1
5.2 Auxiliary Material Supply	5-1
5.3 Fuel Supply	5-3
6 Instrumentation and Control Systems	6-1
6.1 Scope and Base of Study	6-1

6.2 Status of existing Plant Wide Automatic Controls.....	6-1
6.3 Selection of Plant Wide Control Systems and Instruments.....	6-2
6.4 Automatic Control Plan for Process Unit.....	6-8
6.5 Automatic Control Program for Logistics System	6-63
6.6 Automatic Control Program for Utilities and Auxiliary Production Facilities.....	6-65
6.7 Central Control Room	6-66
6.8 Major Codes and Standards Referenced in Design.....	6-68
7 Site Selection.....	7-1
7.1 Conditions for the New Refinery	7-1
7.2 Site Selection.....	7-4
8 Plot Plan, Offsite Facilities, Logistics and Civil Work.....	8-1
8.1 Plot Plan	8-1
8.2 Offsite Facilities	8-5
8.3 Logistics Systems	8-6
8.4 Civil.....	8-30
9 Utilities and Auxiliary Facilities	9-1
9.1 Water Supply & Drainage	9-1
9.2 Power Supply	9-38
9.3 Telecommunication	9-52
9.4 Steam supply	9-56
9.5 Air Compressor Station and Nitrogen Station.....	9-66
9.6 Maintenance	9-73
9.7 Central Lab.....	9-76
10 Energy Conservation.....	10-1

10.1 Basis for the Compilation.....	10-1
10.2 Principles of Energy Conservation	10-1
10.3 Energy Efficiency.....	10-1
11 Water Conservation	11-1
11.1 Principle of Water Conservation.....	11-1
11.2 Water Conservation Measures	11-1
11.3 Water Conservation Indicators and Analysis.....	11-2
12 Fire Protection	12-1
12.1 Overview	12-1
12.2 Configuration of Firefighting Facilities	12-5
12.3 Fire Station.....	12-9
12.4 Investment in Firefighting Facilities	12-9
12.5 Design Regulations, Codes and Standards for Fire Protection System.	12-10
13 Environmental Protection	13-1
13.1 Environmental Quality of the Project Site	13-1
13.2 Environmental Standards and Requirements	13-5
13.3 Pollution and Control Measures of the Project	13-10
13.4 Environmental Management and Monitoring.....	13-31
13.5 The Environment Impact of Construction Project	13-35
13.6 Outstanding Environmental Protection Issues and Recommendations.	13-36
14 Occupational safety and health	14-1
14.1 The occupational safety and health standards and codes adopted in the design	14-1
14.2 The analysis of the occupational hazards and harmful factors involved in the production period	14-1
14.3 Protection program.....	14-8

14.4 Organization structure and manpower allocation.....	14-12
14.5 Investment in labor safety and health.....	14-13
14.6 Anticipated effects.....	14-13
15 Organization structure and provision of HR.....	15-1
15.1 Enterprise management system and organization structure	15-1
15.2 Staffing	15-4
15.3 Staff training.....	15-6
16 Executive plan	16-1
17 Economy evaluation	17-1
17.1 Investment estimate.....	17-1
17.2 Financing and Investment split	17-14
17.3 Financial analysis	17-15
17.4 Appendix Tables.....	17-25
